105 YEARS OF EXPERIENCE OVER 5,000,000 KITCHENS WORLDWIDE

BauTeam

BauTeam History

Founded over 100 years ago, BauTeam has built a legacy of delivering top-quality kitchen furniture. The company's journey began in small workshops, where four Baumann brothers worked—three as carpenters and one as a merchant. Over decades of successful growth, the family-owned factory has expanded to employ over 1,000 people, occupy 33,000 m² of production space, and achieve an annual turnover of nearly 300 million euros. Today, BauTeam boasts state-of-the-art manufacturing facilities equipped with the latest technology and a skilled, cohesive team of specialists. As a result, the company's products are widely distributed across various countries and continue to evolve with the times. In 2014, BauTeam began its rapid expansion into the U.S. market with the introduction of the exclusive BauLux collection, featuring luxurious finishes and exceptional accessories.

The "Made in Germany" seal of approval reflects not only the high standards of our production site but the enduring quality and innovation that BauTeam represents.

BauTeam Production

With the capacity to produce over 1,000 kitchens daily, we can have your project ready in one day.

German quality is a top priority in every aspect of our production process. We dedicate significant time and investment into advanced, high-tech manufacturing plants, efficient production methods, and high environmental standards. Additionally, we only work with professional suppliers who share our commitment to excellence.

Our cabinetry is crafted in a cutting-edge facility where waste is minimized, precision is paramount, and skilled craftsmanship makes all the difference.

Contract Service Process

Estimating

We provide fast and comprehensive quotations, where our focus on efficiency helps reduce costs while maintaining the highest standards. This approach serves as a clear pathway throughout the process. All of Bauformat's production and design expertise is dedicated to supporting our customers, ensuring they maximize the potential of every decision and fully optimize their choices.

Designing

The design phase is crucial, which is why we utilize advanced software to bring concepts to life. We create detailed in-house 3D visualizations to showcase the design outcomes. Each project is developed through a collaborative and agile process, involving constant communication between our company, suppliers, customers, architects, and designers—fostering a true spirit of teamwork.

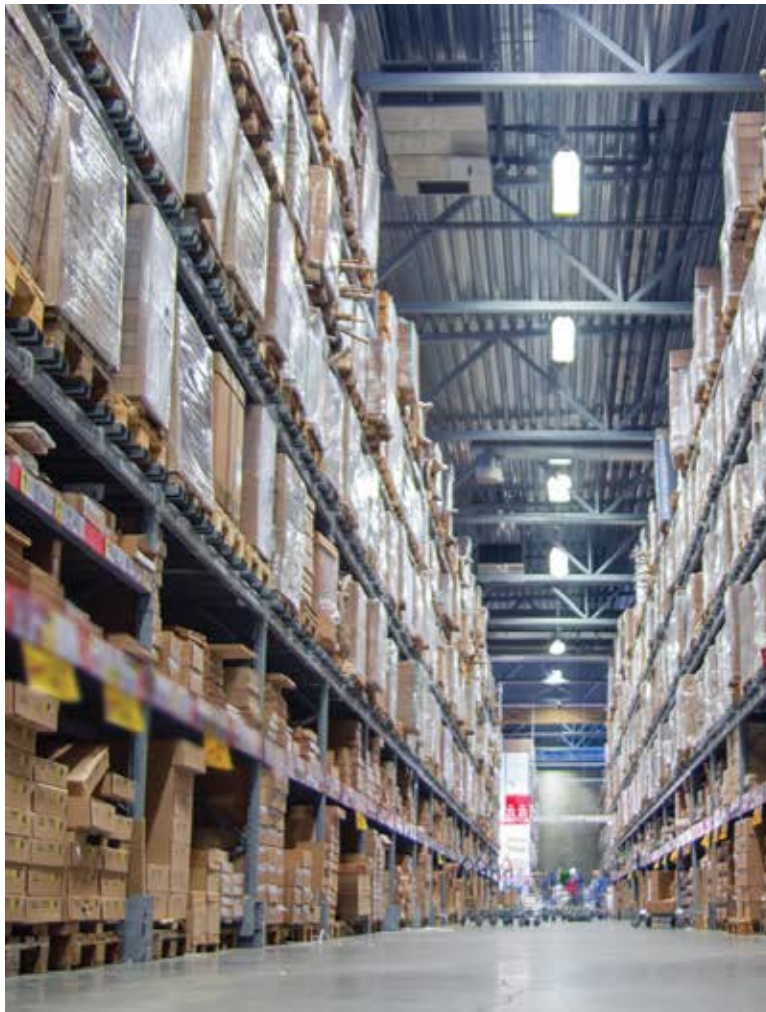

Manufacturing

Technology has never been a challenge for us. We are committed to continuous investment—having invested 42 million euros in the past five years alone into our production department. This reflects our dedication to creativity and our ability to adapt our machinery to the latest advancements. Today, Bauformat proudly manufactures over 1,000 kitchens a day, maintaining the highest standards of efficiency and innovation.

Shipping

We offer weekly shipments to both New Jersey and Los Angeles, with expedited deliveries and replacements available via UPS for added convenience.

Warehouse

Meeting delivery deadlines and requirements is integral to every project, no matter how complex. Our warehouse logistics and transport services operate in seamless coordination to ensure timely deliveries. With 45,000 sq. ft. of storage space in both Los Angeles and New Jersey, we are able to store cabinets locally, providing efficient and reliable service.

Certified Installation Crew

We have several licensed, insured, and bonded installation crews available to handle projects across the USA. Our annual certification program, held every September, guarantees the highest quality standards for our installation services.

Project Management

A representative will be on-site to provide assistance as needed, ensuring we are always accessible to our customers in a timely, consistent, and efficient manner. This approach is key to guaranteeing complete satisfaction with the work we deliver.

Warranty

We offer a Lifetime Limited Warranty on all drawer guides and hinges, ensuring their durability and functionality for the lifetime of the product. Additionally, our cabinets are backed by a Five-Year Limited Warranty, covering the structure and finish to guarantee quality and peace of mind.
